

Objašnjenje izveštaja o penzijskom osiguranju (pension certificate)

Ova brošura objašnjava strukturu izveštaja o penzijskom osiguranju. Pružena su objašnjenja i navedene su korisne informacije o važnim temama.

Numerisani stavovi se uvek odnose na odeljke u primeru izveštaja o penzionom osiguranju. Imajte u vidu da primer izveštaja o penzionom osiguranju obuhvata sva penziona rešenja kolektivnih fondova kojima upravlja Swiss Life. Odgovore na konkretna pitanja vezana za Vaše rešenje naći ćeete u odredbama o penzionom osiguranju.

1 Opšti podaci (General information)

Ovde su navedeni podaci o ugovoru i vama. **Prijavljena godišnja zarada (reported annual salary)** po pravilu odgovara godišnjoj zaradi koju je Vaš poslodavac prijavio starosnom, invalidskom i porodičnom osiguranju (AHV) i treba da bude ista kao vaša efektivna godišnja zarada (bruto zarada prema platnom listu).

Kada se od godišnje zarade odbije koordinacioni iznos dobija se osigurana zarada. Koordinacioni iznos se odbija zbog usklađivanja sa prvim stubom (federalnim starosnim i porodičnim osiguranjem - AHV).

2 Vrednost starosnog fonda (Retirement savings)

Vrednost postojećeg starosnog fonda (accumulated retirement savings) se izračunava tačno po danu i važi od datuma izdavanja. Ona obuhvata ušteđene godišnje doprinose, vrednost ušteđenog kapitala, kamate, kao i kupovine i moguće dodatne doprinosi (npr. viškove).

Ako prekinete radni odnos, imate pravo na vrednost ušteđenog kapitala **pravo na ušteđeni kapital (vested benefits)**. Iznos se prenosi u penzioni fond Vašeg novog poslodavca. Koje su Vaše mogućnosti u slučaju da ne nađete novi posao, možete da pogledate u brošuri "Prestanak radnog odnosa" preko linka na izveštaju o penzionom osiguranju (vidi br. 11).

Kod određivanja kamate na sredstva Vašeg penzijskog osiguranja primenjuje se kamatna stopa navedena u izveštaju o penzijskom osiguranju. Kamatne stope za obavezni deo određuje svake godine federalni savet, kamate iznosa koji premašuje obavezni deo određuje savet fonda, odnosno upravna komisija, a u zavisnosti od vrste penzijskog osiguranja.

3 Isplate u starosti (Retirement benefits)

Kada se penzonišete, po pravilu možete da birate između doživotne starosne penzije, jednokratne isplate kapitala ili kombinacije ova dva rešenja.

Možete da vidite verovatni **kapital (lump-sum benefit)**, odnosno **penziju (annuity)** trenutku redovnog ili prevremenog odlaska u penziju. Verovatni kapital se projektuje pomoću podataka koji su danas poznati (postojeća vrednost starosnog fonda, osigurana zarada, godišnja penzijska odobrenja i trajanje osiguranja do penzionisanja). Projektovana kamata koja se koristi za proračun zasniva se na efektivnoj kamatnoj stopi penzijskog fonda u zadnjih nekoliko godina i takođe je naznačena u izveštaju. Kapital predstavlja osnovu za proračun starosne penzije.

Stopa konverzije je od ključnog značaja za visinu penzije. Množenjem stope konverzije i kapitala dobija se penzija. Ako ranije prestanete sa radom, stopa konverzije se smanjuje, a samim tim i penzija. Starosnu penziju dobijate doživotno kada se penzonišete.

Dodatno uz starosnu penziju se isplaćuju **penzije za decu penzionisane osobe (retired person's children's benefits)** ako je ova isplata predviđena planom penzijskog osiguranja. Penziju za decu dobijate nakon penzionisanja za svako dete bar do 18. godine starosti (ako se radi o daljem obrazovanju, do 25. godine starosti). Osim toga, u slučaju smrti su osigurane porodične penzije za supružnika/životnog partnera i decu.

4 Finansiranje ranijeg odlaska u penziju

(Financing early retirement)

Ako se odlučite za raniji odlazak u penziju, ovde možete da pogledate maksimalni mogući **iznos koji možete da kupite kod odlaska u prevremenu penziju (purchase sums are shown here should you opt for early retirement)**.

Uplatom ovog iznosa možete sebi da obezbedite punu penziju i u slučaju odlaska u prevremenu penziju. Imajte u vidu da se ove informacije pojavljuju tek kada potpuno iscrpite preostali potencijal kupovine (vidi br. 7).

5 Isplate u slučaju invaliditeta (Disability benefits)

Primaćete punu *godišnju invalidsku penziju (annual disability income)* ako ste u skladu sa federalnim invalidskim osiguranjem najmanje 70% invalid i ako je istekao period čekanja.

U slučaju delimičnog invaliditeta visina invalidske penzije se određuje tako što se u ozbir uzima stepen invaliditeta prema penzionim propisima. Penzija se isplaćuju već od stepena invaliditeta odi 25%.

Za svako dete čete bar do 18. godine starosti (ako se radi o daljem obrazovanju, do 25. godine starosti) *primati invalidsku penziju za decu, (disabled person's children's benefit)* sako je ova isplata predviđena planom penzijskog osiguranja.

Oslobađanje od doprinosa (waiver of contributions)

znači da vi i vaš poslodavac u slučaju invaliditeta i nakon isteka perioda čekanja više ne morate da plaćate doprinose. Osigurane starosne, porodične i invalidske penzije i dalje postoje u istom iznosu.

6 Isplate u slučaju smrti pre odlaska u penziju (Benefits in event of death prior to retirement)

Za životnog partnera i istopolnog partnera u slučaju smrti osigurane osobe važe isti uslovi kao i za venčane i registrovane parove, sve dok je zajednica vođena u istom domaćinstvu najmanje u zadnjih pet godina pre smrti osigurane osobe ili postoje zajednička deca o kojoj treba brinuti. Odlučujuće su odredbe važećih penzionih propisa u trenutku smrti. Umesto *penzije za supružnika, odnosno partnera (spouse's or unmarried partner's pension)* vaš supružnik ili partner može da zahteva isplatu celokupnog ili delimičnog iznosa kapitala.

Svako dete koje ima prava na beneficije prima najmanje do 18. godine starosti (ako se radi o daljem obrazovanju, do 25. godine starosti) *penziju za siročad (orphan's benefit)* ako je ova isplata predviđena planom penzijskog osiguranja.

7 Kupovina i vraćanje podignutih iznosa (Purchases and redemptions)

Većina osiguranih osoba raspolaže potencijalom za kupovinu u drugom stubu. Na taj način ostvarujete više ili čak maksimalne isplate penzije. Imajte u vidu da se kupovine mogu izvršiti tek uz zakonski uslov da su unapred uzeta sredstva za kupovinu stana vraćena...

Dodatne korisne informacije o *kupovini i vraćanju podignutih iznosa (purchases and redemptions)* i pravni okviri nalaze se u brošuri "Kupovina" na linku u izveštaju o penzijskom osiguranju (pogledajte br. 11).

8 Finansiranje (Funding)

Vi, zajedno sa vašim poslodavcem, finansirate osigurane isplate. Vaš poslodavac odbija vaš mesečni doprinos od vaše bruto zarade. Razliku do ukupnog iznosa preuzima Vaš poslodavac.

Doprinos štednje (savings contribution) (udeo doprinosa za starosne beneficije) se direktno odražava na visinu starosnog fonda. *Doprinosima za rizik (risk contributions)* finansiraju se osigurane isplate u slučaju invaliditeta i smrti.

9 Opšte informacije (General information)

Maksimalni iznos koji možete unapred da podignite za kupovinu stana (maximum possible prepayment for home ownership) do 50. godine starosti odgovara vrednosti ušteđenog kapitala. Nakon toga može da se podigne ili polovina vrednosti ušteđenog kapitala ili vrednost ušteđenog kapitala u 50. godini, u zavisnosti od toga koji je iznos viši.

10 Upravna komisija (Administrative Board)

Članovi upravne komisije preuzimaju pre svega primenu penzijskih propisa, informisanje osiguranika i izbor članova za savet fonda.

11 Napomene (Remarks)

Dodatne informacije, posebno o penzijskim propisima i aktuelno važeći uslovi, nalaze se na navedenom linku. Ako imate pitanja vezano za penziju, možete direktno da se obratite i Vašem savetniku, on će vas rado posavetovati.
